Whole Number 447

The Lutheran Church and Justification.

Lutherans teach that everything needed to reconcile the world to God was done when Jesus Christ gave His life on the cross; that God has for Christ's sake declared mankind free from the debt and guilt of sin; that the justification of all mankind becomes the property of the individual through personal acceptance thereof; and that all who thus by faith apply to themselves God's gracious declaration of reconciliation are righteous in the sight of God—not by any merit of their own, but solely by grace, for Christ's sake, through faith.

Romans 5, 18-19: Therefore as by the offense of one judgment came upon all men to condemnation; even so by the righteousness of One the free gift came upon all men unto justification of life. For as by one man's disobedience many were made sinners, so by the obedience of One shall many be righteous.

Acts 10, 43: To Him give all the prophets witness that through His name whosoever believeth in Him shall receive remission of sins.

Ephesians 2, 8: For by grace are ye saved through faith, and that not of yourselves; it is the gift of God.

The St. Matthew Walther League

Ford

FORD SAFETY.

Safety, comfort, reliability, economy, speed, acceleration, beauty—these are the features that make the new Ford such good value. Of all these is none more important than SAFETY.

The safety of the new Ford comes not only from its efficient brakes, but from many other factors. Among these are, ease of steering and control, the Triplex shatterproof glass windshield, and the sturdy, balanced construction of the car.

We can make immediate deliveries on all models.

Lutheran Service in English Next Sabbath Evening.

At the inauguration of the Lutheran service in English in Stony Plain on Sunday evening, Feb. 17, Pastor Osterman intimated that this was in compliance with the Savior's command that the Gos-

pel should be preached in every tongue. At the initial service the edifice was well-filled despite the inclement weather. Pastor Osterman will hold another of these services in Stony next Sunday evening, March 3d, when a special musical selection will be given.

LOCAL NEWS.

Mr. Jac. Miller, Wembley, is in town.

Miss Elizabeth Kulak, of the hospital staff at Onoway, is spending a few days with her brother Mr. Karl Kulak.

Hoffman & Zucht, the motor expressmen, who have been making valiant efforts to keep the trail to the City open for motoring, have given up the job until better weather conditions prevail.

Judge Lees has handed down his decision in Louie Heichel's appeal from a decision of Magistrate Williams in a prairie fires ordinance case. The judge dismissed the appeal, and the conviction stands.

Owing to the blockaded roads on Saturday last, the Jas Phelan auction sale was postponed to Sat. Mar. 9.

The garagemen and motor expressmen interested in road travel are making a big effort to open the Baseline to Winterburn for motor travellers. Mr. Hennig opened the road from Gidea Spike to Spruce Grove with a grader and ten horses.

Winners at Whist.

The winners at the whist drive put on Friday night last by the Town Band are—

1, Mrs. E. C. Schmidt; 2, Miss Esther Wolfe and Mrs. J. H. Miller tied for second place. They cut the deck, high card being winner. Esther Wolfe won.

3, Miss-Mabelle Clarke.

Men—1, Val J. Kulak.

2, E. H. Baron.

3, Jac. Fuhr.

Sporting Notes.

Stony's senior hockey team took a sleigh ride on Sunday afternoon to Callahoo in Mr. Eric Heichen's carriage, to play the team there. Some good hockey was put up, and the play was very interesting, with most of the action being in Stony team's favor. Final score: Callahoo 3; Stony 7. There will be a return game in Stony on March 3d. Rosnau was the star player of the day, he scoring 4 of the 7 goals made.

The High School hockey team had a practice Tuesday night, in preparation for their next big game.

A big bonspiel among the local teams is on, this week, at the local outling rink.

Inga M.D.'s Annual Election

The results of the polling for Councillors in the two divisions in which there were contests in Inga Municipal District are—

Division One—
M. McKinlay 117
Christie Pitzler 108

Division Four—
Fred J. Francey 56
J. Collingridge 21

Div. 6—Councillor R. Goetz re-elected by acclamation.

Power and Its Dangers

Down through the ages man has striven for power, and yet more power. From the biblical story of creation we learn that man was given power and dominion over the beasts of the field, and thus early in his career set out to establish his power over all the forces of nature. From that time down to the present with ever increasing eagerness and energy man has sought for power.

It is recorded of Alexander the Great that, having conquered the then known world, he sighed for more worlds to conquer. Egypt under the Pharaohs, Rome under the Caesars, Carthage, Greece, all the great empires of the past strove for power, and, having attained it, were ultimately destroyed by it. The same was true of Napoleon, and in the lifetime of the present generation it has again been proven in the case of the Kaiser Wilhelm.

By way of contrast the history of Britain during the last one thousand years may be noted. The British Empire is today the most powerful political entity in the world. It has gone on from strength to strength and increased in power, not through the autocratic use of its power, but, by a paradox, in continually and voluntarily relinquishing powers which it enjoyed to subordinate peoples and colonies, raising their status, conferring new powers on them, and accepting them on terms of equality with itself. The most dangerous period in Britain's history was when it did not pursue such a course and sought to impose its will upon the thirteen American colonies. At that time instead of gaining or retaining power, it lost it. That lesson has never been forgotten by British statesmen.

Power wielded wisely will increase, but exercised unwisely and autocratically it will destroy itself. This is just as true in the case of individuals, corporations and associations as it is in the case of rulers, governments and countries. It is especially true of monopolies of all kinds, and it is because monopolies have and do make use of their power unfairly and arbitrarily that there has developed such a large body of public opinion favorable to the principle of public ownership and operation of all services which in their very nature must be monopolistic, as, for example, railways, telephones, electric power systems.

In the early days of Western Canada the C.P.R. enjoyed a monopoly in transportation. It was rather autocratic; perhaps in those days it had to be, but its management was wise and far-seeing, and, in later years, using its great power for the good of the country, it has grown still more powerful, powerful and successful, and, at the same time, stronger in the esteem and goodwill of the people.

The organized grain trade of Canada wielded great power, but, not being so amenable to public opinion, it has lost much of its power. It is still inclined to be selfish, and in that fact lies its danger, because it cannot be denied that it is losing instead of gaining in public favor, with the inevitable result that year by year it is being hedged about with greater restrictions and a larger measure of public control.

The same danger confronts the great banking institutions of the country, and the people are becoming increasingly restive under the steady absorption of small banks by the larger ones. The banks may, for the time being, become more powerful, but there is always a greater power, the people themselves, and the banks may succeed in becoming so consolidated and powerful that it will become all the simpler for the people to step in and take their powers to the nation itself.

In this electrical age, water powers, coal resources, and electrical distribution systems are the very life-blood of industry. Upon them is dependent most of the conveniences of modern life. Control of electrical development means great power, both directly and indirectly. Financial magnates and captains of industry are fully alive to this fact, and there is keen competition throughout the world, and especially on this continent, to obtain such control. It means power in a double sense. It is the live question in the Dominion Parliament, the Manitoba Legislature, the Alberta Legislature now in session, as well as the outstanding question before the Saskatchewan Legislature recently prorogued. It is the biggest issue in Ontario and Quebec, and the outstanding problem at present affecting the relations of Canada and the United States.

In Ontario the controlling factor are the people themselves through their Provincially-owned system. The Saskatchewan Government has adopted the same policy. But unfortunately the situation is not so satisfactory in Manitoba and Alberta. And now come reports that United States interests are seeking to secure control of Canadian companies operating in the west, which would have the effect of bringing this country within the tentacles of the big American Power Trust.

Sour Stomach

Just a tasteless dose of Phillips' Milk of Magnesia in water. That is an alkali, effective, yet harmless. It has been the standard antidote for 50 years among physicians everywhere. One spoonful will neutralize at once many times its volume in acid. It is the right way, the quick, pleasant and efficient way to kill the excess acid. The stomach becomes sweet, the pain de-

parts. You are happy again in five minutes. Don't depend on crude methods. Embody the best way yet evolved in all the years of searching. That is Phillips' Milk of Magnesia. But also to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any druggist.

No Time For Train Travel

Lindbergh Finds Airplane Best Way To Get Around

When Col. Lindbergh set out in the first week in February in a flight to inaugurate the air mail service between Florida and the Canal Zone, he was asked how long it had been since he had travelled in a railroad train.

"More than a year and a half—before I flew to Paris," he replied.

Since he landed to fly, Col. Lindbergh, up to the time of the Florida-Panama flight, had covered 270,000 miles in flight. This distance is equal to about eleven times the circumference of the earth. The time he had spent in the air totaled 3,000 hours, or about four months of the ground. In 1928 he was 800 hours in the air, or more than thirty-three days. In this time his flights totaled 85,000 miles.

"I wouldn't have time to go so many places if I didn't fly," he said.

Fine Cough Remedy

Druggists' Will Observe Buckley's Cough Mixture Week

The week of February 28th to March 6th, is being observed by the retail druggists of Canada as "Buckley's Cough Mixture Week."

This week has been arranged by the Retail Merchants' Association of Canada and the Provincial Boards of the Retail Merchants' Association, in co-operation with Messrs. W. K. Buckley, Limited, the manufacturers. This product has been on the market for many years and because of its rapidly increasing favor with Canadians during the last few years "The Week" is being featured this season to focus additional attention on this fine cough remedy.

Toes Made Comfortable Sore Corns Removed

Quick, safe relief is almost instantaneous if you apply PUTNAM'S CORN EXTRACTOR. Shoes won't pinch or hurt you any longer. Putnam's stops the pain. A few applications make the corn dry up and drop off. Putnam's Corn Extractor gives satisfaction. Thousands use it every day. Get a bottle from your druggist. Refuse a substitute for "Putnam's" the one sure relief for sore corns.

A race of people in India believe that all elephants have two trunks three eyes and ten legs in the land to which elephants go after death.

A PERFECT MEDICINE FOR LITTLE ONES

Baby's Own Tablets Should Be In Every Home Where There Are Children

The perfect medicine for little ones is found in Baby's Own Tablets. They are a gentle but thorough laxative which regulate the bowels, sweeten the stomach, drive out constipation and indigestion; break up colds and simple fever and promote healthful and refreshing sleep. It is impossible for Baby's Own Tablets to harm even the new-born babe as they are absolutely guaranteed free from opiates or any other injurious drugs. Concerning them Mrs. Earl Taylor, Owen Sound, Ont., writes:—"I have four children and have always used Baby's Own Tablets. I am never without the Tablets in the house as they are the best medicine that I know of for little ones."

Baby's Own Tablets are sold by druggists and by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Arizona and New Mexico are the youngest states, having been admitted into the Union in 1912.

A Prime Dressing For Wounds.—In some factories and workshops carbolic acid is kept for use in cauterizing wounds and cuts sustained by the workmen. Far better to keep on hand a bottle of Dr. Thomas' Electric Oil. It is just as quick in action and does not scar the skin or burn the flesh.

It is estimated that a person at the height of 6,000 feet can see approximately 90 miles on a clear day.

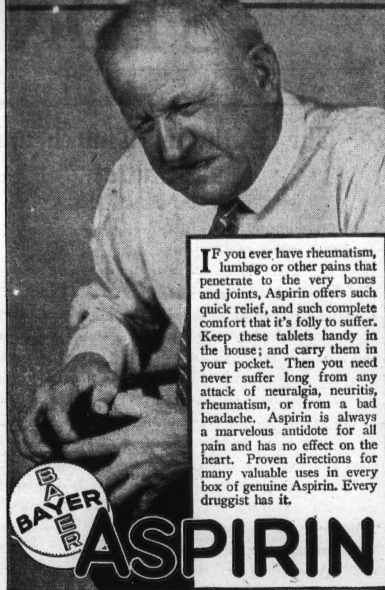

If one be troubled with corns, he will find in Holloway's Corn Remover an application that will entirely relieve suffering.

It takes 17 days to deliver a letter from London to Cape Town.

Minard's Liniment for the Grippe and Flu.

W. N. U. 1774

ACHING JOINTS

Aspirin is a Trademark Registered in Canada

If you ever have rheumatism, lumbago or other pains that penetrate to the very bones and joints, Aspirin offers such quick relief, and such complete comfort that it's folly to suffer. Keep these tablets handy in the house; and carry them in your pocket. Then you need never suffer long from any attack of neuralgia, neuritis, rheumatism, or from a bad headache. Aspirin is always a marvelous antidote for all pain and has no effect on the heart. Proven directions for many valuable uses in every box of genuine Aspirin. Every druggist has it.

Alberta Potato Growers

A New Market Is Opening Up In the Southern States

Southern Alberta potato growers have a new market opening up in the southern states, according to M. L. Freng, district agriculturist, who pointed out that while Montana was quite a source of supply in this direction, the south was beginning to look to Alberta for first class certified potatoes. An organization has been formed in Edmonton to foster this trade with the aid and approval of the Provincial Government.

Use Minard's Liniment for the Flu. Effective Tack

If we had talked of preparing for peace in time of peace as long as we have of preparing for war in time of peace, the nations of the world would not be laboring, as they now are, under the burden of billions in taxes every year for armament.

What He Must Know

A young farmer can get along very well without a knowledge of Latin or Greek, but to succeed he must know something of soils, of pests, or of fungous diseases and a dozen other subjects that confront him every day. Education is necessary, but not the kind that education speaks of as disciplinary; hard knocks and adversity will accomplish that.

RICKETS

Children with weak bones or poor dentition receive great benefit from the use of

Scott's Emulsion

It is wonderfully pure, vitamin-rich cod-liver oil and helps build a strong, healthy body, sound bones and teeth.

Scott & Bowne, Toronto, Ont. 25-46

Cut Down Food Wastage

Canada Takes Leading Part Among Nations of the World In the Control of Narcotics

The following article was prepared at the direction of Dr. J. A. Amoyt, Deputy Minister, Department of Pensions and National Health, by Mr. C. H. L. Sharnan, Narcotic Division.

One of the most urgent social problems confronting the League of Nations is the world-wide illegal use of drugs, but long before the formation of the League, in the work of which Canada has taken an important part, the Dominion had enacted drastic measures for the control of the opium traffic and the elimination of the illicit use of narcotics within her boundaries.

The first Act dealing specifically with the subject in Canada was passed by the Dominion Parliament in 1908. This made it an offence to sell, offer for sale, possess, or manufacture opium prepared for smoking, or crude opium for other than medicinal purposes. Three years later in 1911 further enactment brought the three drugs—heroin, morphine, and cocaine—under control and on account of these statutes the Dominion was justly regarded at that time as having the most advanced legislation thereupon in the world. With a view to the international control of the opium traffic, Canada was represented at the subsequent conferences at the Hague in 1912 and 1913.

In addition to making it an offence to possess, manufacture, sell, or distribute the various derivatives of opium and cocaine, except for medicinal or scientific purposes, the 1911 Act stipulated that these drugs should be sold only by a bona fide wholesale or retail druggist, to physicians, veterinary surgeons, or dentists, or on prescriptions issued by members of these professions. As a matter of fact, the Hague Conference agreements were to all intents and purposes already embodied in the Dominion's 1911 Act, but these agreements were never ratified by other countries until after the conclusion of peace, when the Treaty of Versailles included a clause whereby the International Opium Convention was incorporated therein and brought into force.

In conformity with the ideals of the League of Nations, a still more stringent act was passed by the Dominion Government in 1920, and in 1922 an amendment was made providing for the deportation of all aliens convicted of trafficking, irrespective of the length of their stay in Canada. Incidentally, between June, 1922, and January, 1927, 466 persons were deported. In 1923 another Act was passed, tightening up every probable loophole of evasion, followed by further regulations and amendments in 1924, 1925, and 1926, which made the legislation on the subject as perfect as humanly possible. The Narcotic Act as it now stands specifies a maximum penalty of seven years imprisonment with a minimum of six months and a maximum fine of \$1,000, with a minimum of \$200 in case of trafficking, while in cases of sale of narcotics to a minor, the court is empowered to impose the lash in addition to any other punishment.

Owing to her strategic position between the East and West, Canada is one of the world's highways over which this traffic would naturally pass. Her alertness, therefore, in combating the narcotic evil not only conserves the health of the people, one of our greatest natural resources, but also assisting in maintaining the welfare, peace, and good order of the world.

"Yes, if I called you a rhinoceros it was an insult. Not to you, but to the rhinoceros."—Lustige Köhner Zeitung, Cologne.

W. N. U. 1774

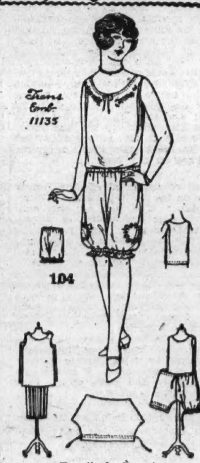

Aid To Agriculture Trees Are Of Benefit To Production On Prairies

The planting of trees on prairie farms in Western Canada is having an appreciably beneficial effect on the quality and variety of agricultural production in that part of Canada. The large and growing distribution of planting material made from the nursery stations of the department of the interior at Indian Head and Sutherland, Saskatchewan, is gradually changing the general appearance of the prairies in the provinces of Manitoba, Saskatchewan and Alberta, and the development of shelterbelts is being followed by the setting out of apple and small fruit orchards, gardens of fine vegetables, and by further beautification of prairie homes with shrubs, flower beds, and extensive lawns.

Not Just What He Meant

A young attorney, taking his first case, had been retained by a farmer to prosecute a railway company for killing 24 pigs.

He wanted to impress the jury with the magnitude of the injury. "Twenty-four pigs, gentlemen. Twenty-four; twice the number in the jury box."

Practical-Smart
If you have a little daughter of 6, 8, 10, 12 and 14 years in your home, you'll thoroughly appreciate design No. 104 consisting of a vestee and bloomers. These attractive undies can be made at a remarkable saving of durable fabrics that will give splendid wear. Elastic is inserted through a hem at top of bloomers and through a casing above knees forming flirt. For the 6-year miss, 1 1/2 yards of 60-inch material is sufficient to make both vestee and bloomers. Batiste, crepe de chine, rayon crepe, cross bar dimity, washable crepe satin, lawn and novelty cottons crepe are smart suggestions. Pattern price 25 cents in stamps or coin (coin preferred). Emb. No. 11135 (blue), costs 10 cents extra. We suggest that when you send for this pattern, you enclose 10 cents additional for a copy of our Fashion Magazine, showing all the most attractive Paris styles, embroidery, etc.

who has been appointed Industrial Agent, Manitoba district, in keeping with the policy of the Canadian National Railways to give assistance in the development of Western Canada by aiding the establishment of industries. Mr. Chambers will have his headquarters at Winnipeg.

Index To Growth Of Prairie Provinces

Acres Under Production Shows Large Increase In Past Few Years

The rate of settlement in the prairie provinces has not kept pace with what it was before the war, but the expansion of acreage put into production has been marvelously accelerated.

The Ottawa publication, Natural Resources, shows this in a graph. In 1900, from when the great influx of settlers into the west may be said to date, 3,600,000 acres had been brought into production. In ten years more, heavy incoming settlement had increased that acreage to 13,607,000.

The acreage under production by 1913, when settlement reached the peak, is not shown in the graph. But it is given for 1920. It had then more than doubled what it was in 1910. It had risen to 30,325,000 acres. Though incoming settlement in the last ten years has not been looked upon as excessive, and often has been despised as indicating an ebb, it is not the index to development in western agricultural production. For each of the last eight years, the prairie provinces together have increased their productive area by at least a million acres. Dominion statistics show the West had brought into agricultural production by last year 37,980,000 acres.

Named His Own Sentence

A judge in Valence, France, recently asked a prisoner, on trial for murder, to put himself on the judge's bench and imagine the judge was the culprit. "What sentence would you inflict upon me if you were in my place as judge and I were in yours," the judge asked. "I have killed," the prisoner said. "I deserve to be killed. Kill me."—He was sentenced to death.

Brother: "I trust that you are happy with your husband, Maud?" Maud: "Oh yes; as happy as one can expect to be with a man who is talking of himself half the time and of his first wife the other half."

Auxiliary Schooner Is Built For Use of R.C.M.P. in Patrolling Canada's Far Flung Arctic Coast

Amounts To Large Sum Waste In Small Ways Soon Runs Into Millions

In dealing with the question of extravagance and waste, a speaker on the floor of the British House of Parliament made the statement, says a writer in *Ti-Bits*: That every year more than four million bottles of medicine are wasted because the average table-spoon holds more than four drams, which is the usual dose. Most of us, when we write a telegram in a postoffice, use more than one form before we are satisfied with what we have written. We think nothing of this, but the G.P.O. complains that seventy million telegraph forms and their way into waste-paper baskets every year.

Gas companies lose tremendous quantities of gas through tiny leaks in the mains that cannot be traced, or very small mistakes in registering meters. One gas company puts its losses on this account at three million therms a year.

How much water is wasted by a dripping tap? An answer was provided when New York decided to levy a fine of two dollars for every tap found leaking. In two years 40,000 million gallons of water were saved.

It seems absurd to worry about the amount of steam wasted when a locomotive blows a whistle. But Dr. Foley, of Indiana University, has calculated that 2,454,028 tons of coal are consumed annually in generating steam to blow. United States locomotive whistles, and that if the whistles were moved slightly forward and adapted to a single high-pitched note, more than a million pounds a year could be saved.

But this loss is small compared with that involved in throwing into the dustbin cinders that would still give a lot of heat. It is estimated that a third of the cinders thrown away retain from fifty to seventy per cent. of their heating value.

Alberta Poultry

A New High Mark For Industry Is Set During 1928

A new high mark in the value of the poultry industry in Alberta has been set during 1928, according to the annual report of the Poultry Commissioner, J. H. Hare. Figures arrived at with the co-operation of the Dominion Bureau of Statistics show that the numbers of the various kinds of poultry on Alberta farms in 1928 were as follows: 1,398,214 turkeys; 200,922 geese; 99,238 ducks; 5,496,130 other fowl; a total of 6,213,706 as compared with 5,853,000 in 1927. A corresponding increase in the value of poultry is shown in the fact that this reached \$6,090,293 in 1928, as against \$4,621,000 in 1927.

Plans For New Dominion

A movement to make Palestine a permanent part of the British empire as a Dominion, after expiration of the 25 year period of the mandate granted by the League of Nations, has been launched.

MAKE SKIING POPULAR

Here we have five good reasons why Skiing is so popular now in Quebec. There are cross-country races for ladies, junior and senior events and jumping for the experts. With its ice pagent, the most colorful winter event of the east, and the International Dog Sleed Derby, Quebec City has become in winter even more of a popular resort than it is in the spring and summer.

Among the many activities of the Royal Canadian Mounted Police is included the maintenance of national prestige and the preservation of rights of life and property on Canada's far-flung Arctic coast.

From Herschel Island at the western boundary of Canada's coast line to Boothia Peninsula on the east is over 1,200 miles direct, but following the irregularities of the shore the distance is much greater. The whole region is far beyond the Arctic circle.

The native population is Eskimo. There are a few missionaries and some traders including the Hudson's Bay Co. Indian population does not extend northward to the coast.

There are six police detachments: Herschel Island, Akivik, Pattie Island (Cape Bathurst), Langton Bay, Bernard Harbor and Cambridge Bay (on the great Arctic island of Victoria Land). This latter is 900 miles east of Herschel.

Communication is by dog-sled in the long winter and by water in the short summer.

Hitherto the police have depended upon the vessels of the Hudson's Bay Co. or other traders for summer inter communication and the transportation of men and supplies. But during the past season the prestige and efficiency of the Arctic section of the police force was markedly increased by the arrival of the auxiliary communication schooner, St. Roch, which heretofore will do patrol work and distribute supplies throughout the western Arctic during the season of open water. It will, in fact, be a floating police post.

Vessels of the Canadian Arctic from Bering Strait do not reach Herschel until some time after the waters eastward to Coronation Gulf and beyond have been open to navigation. In order to be sure of passing Point Barrow, Alaska, in safety on their way out to Bering Strait, vessels must leave Herschel early in September, although there is still several weeks of navigation to the eastward. By wintering in the Arctic the St. Roch will be able to take advantage of the whole of the season of navigation for the discharge of its patrol and other duties.

The St. Roch was built last winter in North Vancouver by the Burrard Dry Dock Co. Its length is 95 feet; beam, 24 feet; speed, 7 knots; cargo capacity, 175 tons. Besides a full equipment of sails as a schooner, the St. Roch has Diesel engines of 125 horsepower.

She left Vancouver on June 24th and arrived at Herschel on July 30th. She sailed from Herschel on August 1st for Cambridge Bay and returned August 24th. She is now in winter quarters at Langton Bay, 250 miles east of Herschel.

She has a wireless equipment which communicates with Akivik, and through Edmonton to Ottawa. Before tuning in with Akivik she was able to reach the boat Bay Mauv of the Hudson's Bay Co. at Cambridge Bay, 600 miles distant. The Bay Mauv reached Cape Hope's Advance on Hudson Strait and proceeded thence to Ottawa.

The detachment on the St. Roch comprises Sergt. Frederick Anderson, in charge, and nine men, including a wireless operator, all certified master mariners. The third officer is an ex-naval midshipman who saw service in Belgium during the war.

Owing to bars at the mouths of the several arms of the Mackenzie delta, the St. Roch will not be able to reach Akivik. But connection between Shingle point on the Arctic coast west of the delta and 75 miles from Akivik can be maintained by smaller power-boats, of which many are available.

Having their own means of transportation with full efficiency the police are now equipped to give a measure of supervision all along the western Arctic coast to matters that were entirely beyond their reach in the conditions under which they had hitherto been working.

A man whose life was despaired of by a doctor when he was a boy, has just died at the age of 102. Doctors are generally right in the end.

Good Blue Ribbon Tea

Only choice leaves grown at high altitudes go into the blending of Blue Ribbon Tea. That is why its flavour is so uniformly excellent. Insist upon getting it from your grocer—refuse substitutes of inferior quality.

WORLD HAPPENINGS BRIEFLY TOLD

While visiting the Canadian section of the World Industries Fair the Prince of Wales said that he intended to endeavor to visit Canada again in the near future.

An electrical device which makes it possible for an aeroplane pilot to turn on airport landing lights by simply sounding a siren as he flies toward the field has been tried out successfully at Newark, N.J.

General Edward J. Higgins, new leader of the Salvation Army, was greeted by more than 4,000 persons at Clapton, England, at the first of a series of mass demonstrations to introduce the new chief to the army. The newspapers quote Colonel James Fitzmaurice, who resigned as chief of the air forces of the Irish Free State, as saying that he intends to attempt a flight from Berlin to New York by way of the Azores in June.

The number of dependent and disability pensioners in Canada total 70,610 persons, according to a return tabled in the House of Commons. British Columbia has 6,258 disability pensioners; Alberta, 3,944; Saskatchewan, 3,316.

OLD RELIABLE.

Lace Making Old Art
Lace making was invented in the year 1501 at St. Annaberg, in Saxony, by Barbara Uttmann. The first establishment of lace manufacture in England is said to be due to some refugees from Flanders, who settled in the village of Cranfield, in the west of the county of Bedford, adjoining Buckinghamshire.

SEVERE ITCHING BURNING ECZEMA Covered Chest and Throat. Healed by Cuticura.

"Eczema broke out in a rash and covered my chest and throat. It was of a wet nature and the itching and burning were so severe that I scratched and caused eruptions. My clothing aggravated the breaking out on my chest, and the irritation prevented me from sleeping. The trouble lasted about three weeks.

"I tried several remedies without helping me. I began using Cuticura Soap and Ointment and after applying them once I felt greatly relieved, and in about two weeks I was completely healed." (Signed) Mrs. Harry McCormack, New Edinburgh, N. S., June 22, 1928.

Use Cuticura to heal skin troubles. Keep one Ointment 25 and 50c. Talisman, the Gold Seal Brand, 1/2 lb. Cuticura Soap, 2 lb. Cuticura Shaving Stick, 25c.

W. N. U. 1774

Track Would Direct Planes and Steamers

Engineer Says Charged Wire Strung Along Channel Would Provide Safety

An electric "track" has been developed over which steamships, dirigibles and airplanes could "run" and be absolutely indifferent to the dangers of fog, thick weather and perilous harbors' channels. Robert H. Mariott, newly-appointed consulting engineer to the Federal Radio Commission, told electrical engineers who came from all parts of the United States to attend the winter convention of their society at the Engineering Societies' Building, New York.

The "track" which would keep steamers and aircraft from going astray in thick weather consists of a cable charged with electricity, laid down the middle of a harbor channel, or in the case of aircraft, stretched on poles like a telegraph line from one city to another, under the regular airway.

AFTER EFFECTS OF DREADED INFLUENZA

Overcome By the Use of Dr. Williams' Pink Pills

Throughout Canada influenza prostrates thousands of busy-men and women every winter, wrecking their health and leaving behind numerous serious ailments. It is the after-effects of influenza that cause such widespread misery. Here is the real remedy. Dr. Williams' Pink Pills increase the blood, feed the nervous system and renders its victims liable to rheumatism, indigestion, neuritis and other nervous disorders. You can avoid the influenza by keeping the blood rich and pure with Dr. Williams' Pink Pills, or if because you have not recognized your blood weakness the trouble fastens its fangs upon you, its disastrous after-effects can be driven out by the same remedy. Dr. Williams' Pink Pills increase and enrich the blood, feed the starving nerves and thus impart new health and strength to feeble men and women.

Here is proof of the power of Dr. Williams' Pink Pills to banish these disastrous after-effects of influenza. Mrs. W. J. Radford, R.R. 5, Belleville, Ont., writes—"I can recommend Dr. Williams' Pink Pills because they put me on the road to health after other medicines had failed. I was in a bad condition after an attack of influenza and my friends thought that I would never get well. I tried remedy after remedy without relief till my mother begged me to try Dr. Williams' Pink Pills and got me a supply. I began using them and before they were all gone I could see they were helping me so my husband bought a further supply. I continued taking them for some time and they fully restored my health. Naturally I am always ready to recommend them to other sufferers and I never lose an opportunity to do so."

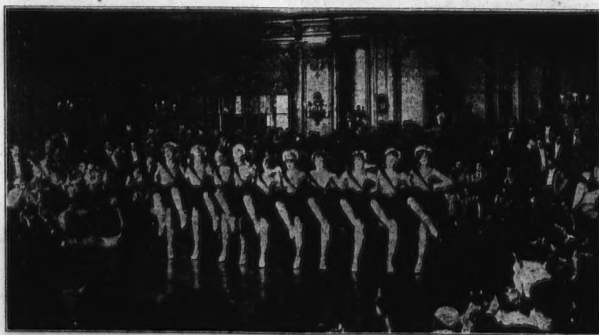

You can get these health-renewing pills through any dealer in medicine or by mail, post paid, at 50 cents a box from Dr. Williams' Medicine Co., Brockville, Ont.

Some of England's finest fleeces come from the Orkney and Shetland Islands, where seaweed forms a large part of the sheep's foodstuff.

Minard's Liniment for Coughs and Colds.

Elm trees around a field are sometimes cut down because they drain strength of the soil.

"EVERYTHING SHIP SHAPE"

No, it's not a Paris stage scene. It's just an interior view of the giant Cunard liner "Berengaria" when some of England's leading stage people were guests aboard the Cunarder recently, and were royally entertained by sprightly dancing girls. This line, founded by the Canadian, Sir Samuel Cunard, operates a score of such floating palaces between British and Canadian and American ports, with economical quarters for the stream of tourists to the Canadian farm lands.

PROOF OF DYES is in the dyeing!

Words won't dye a dress, or coat, or sweater. It takes real anilines to do that. That's why Diamond Dyes contain from three to five times more anilines than any other dye-by actual test.

It's the anilines in Diamond Dyes that do the work; that give the colors such brilliance; such depth and permanence. It's real aniline that keeps them from giving things that re-dyed look; from spotting or streaking.

Next time you have dyeing to do, try Diamond Dyes. Then compare results. See how soft, bright, new-looking the colors are. Observe how they keep their brilliance. Your dealer will refund your money if you don't agree Diamond Dyes are better dyes.

The white package of Diamond Dyes is the original "all-purpose" dye for any and every kind of material. It will dye or rest silk, wool, cotton, linen, rayon or any mixture of materials. The blue package is a special dye, for silk or wool only. With it you can dye your valuable articles of silk or wool with results equal to the finest professional work. When you buy—remember this. The blue package dyes silk or wool only. The white package will dye every kind of goods, including silk and wool. Your dealer has both packages.

SUNDAY SCHOOL LESSON

MARCH 8

THE CHRISTIAN CHURCH

Golden Text: "So we who, as many are one body in Christ."—Romans 12:5.

Lesson: Matthew 16:13-20; Mark 4:26-32; Romans 12:4-8; Ephesians 1:15-22; 2:13-22; 4:4-8, 11-16; 5:22-27; 1 Timothy 3:15.

Devotional Reading: Ephesians 4:11-16.

Explanations and Comments

The Christian Church is a Growing Church, Mark 4:26-32. And Jesus said, "So is the Kingdom of God," that is, what you see to be God's method of working in Nature is also His method of working in the spiritual realm. The parables of Jesus show us that the term "the Kingdom of God" has to do with man's spiritual nature and possibilities, his inner life; it is the reign of God in the hearts of men. The Kingdom of God is as if a man should cast seed upon the earth—as Jesus and the apostles and His later followers have implanted the word of God in the hearts of men. After having sown the seed, the planter sleeps by night and rises by day; that is, he leads his customary life and leaves the result of the sowing with God. And the seed springs up and grows, he knoweth not how.

One of the most effective vermin-fuges on the market is Miller's Worm Powders. They will not only clear the stomach and bowels of worms, but will prove a very serviceable medicine for children in regulating the infantile system and maintaining it in a healthy condition. There is nothing in their composition that will injure the most delicate stomach when directions are followed, and they can be given to children in the full assurance that they will utterly destroy all worms.

Protect the child from the ravages of worms by using Mother Greaves' Worm Exterminator. It is a standard remedy, and years of use have enhanced its reputation.

Regular night flights for life benefit of tourists are now being made over Hamburg, Germany.

A "Tramp" Aeroplane

A "tramp" aeroplane has successfully undergone its trial flights in England. Having a spacious cabin resembling a railway luggage van, the huge machine can be used as a freight carrier, for the transport of troops, or as a long-distance bomber.

Muscular Rheumatism Subdued.
When one is a sufferer from muscular rheumatism he cannot do better than to have the region rubbed with Dr. Thomas' Electric Oil. Let the rubbing be brisk and continue until ease is secured. There is more virtue in a bottle of it than can be fully estimated.

New Patient—And is your treatment completely successful?

Nerve Specialist—My dear sir, it's so successful that only last week one of my patients tried to borrow five hundred dollars from me.

It May Be Urgent

When your Children Cry for It

Castoria is a comfort when Baby is fretful. No sooner taken than the little one is at ease. If restless a few drops soon bring contentment. No harm done, for Castoria is a baby remedy, meant for babies. Perfectly safe to give the youngest infant; you have the doctors' word for that! It is a vegetable product and you could use it every day. But it's in an emergency that Castoria means most. Some night when constipation must be relieved—or colic pains—or other suffering. Never be without; some mothers keep six extra bottles, unused, to make sure there will always be Castoria in the house. It is effective for older children, too; read the book that comes with it.

Fletcher's CASTORIA

CONSTRUCTION OF A NATIONAL HIGHWAY URGED

Ottawa.—The railway terminals situation in Montreal must be faced "and faced in a rather large way in the very near future," Hon. Charles A. Dunning, minister of railways and canals, informed the House of Commons. The minister was speaking during debate on the resolution of D. F. Kellner, (U.F.A., Athabasca), which calls upon the government to consider making a further federal grant for the next five years highway construction.

Mr. Dunning drew attention to the fact that Canada was the owner of a large railway transportation system, and that its needs must be considered when large expenditures from the federal treasury on highways were contemplated. He did not want himself placed on record as being opposed to the construction of a national highway.

"But I do say, we must always have regard to the fact that over two billion dollar investment on railways in providing for the development progressively, over a period of years, of a form of transportation which will tend to reduce possibility of our railways earning of their own way," warned the minister.

Mr. Dunning stressed the point that the provinces themselves prefer increased subsidies to grants which are earmarked for specific purposes, such as highway construction. They were opposed to government grants with strings attached.

Later debate was productive of an amendment from Mr. Carmichael (Progressive, Kinross), which favored the construction of a national highway from coast to coast as soon as possible.

The majority of speeches favored federal aid in the construction of highways. The advantages which would accrue to the Dominion through increased tourist traffic, and the additions to the federal treasury because of the purchase of more motor cars, were mentioned as arguments for the resolution.

E. J. Garland (Progressive, Bow River), said that nothing would serve as well as a national highway to bring the coast and west together. It was repugnant to think that in crossing the country by automobile, it was necessary to travel part of the way in the United States on account of the roads.

"There is not a prairie member," Mr. Garland declared, "who has not experienced a thrill by the sight of a motor car with a Quebec or better still a Nova Scotia license."

Dr. T. E. Kayser (Progressive, Ontario), said the great need of the west was communication by good roads. He favored the resolution.

David Spence (Conservative, Parryville), said he noticed that support for the resolution was only coming from his side of the house.

"The members of the opposite side," Mr. Spence said, "especially the members from Saskatchewan, are sitting there as if puzzled."

In his opinion, good roads were a national welfare.

Radio Plans Completed

League Of Nations Will Conduct Broadcast Trials In March

Washington.—The radio commission has received a communication from the secretariat of the League of Nations through the state department, announcing plans of the League to conduct short wave broadcast trials in March to Canada, the United States, South America, Japan and Australia.

Speeches of general interest to the world will be broadcast. The broadcast to America will be conducted on March 12, 19 and 26. "POLL" is the best station and it uses a wavelength of 18.4 metres.

Railties Sale Of Railways

Edmonton.—After a debate lasting through one afternoon and part of another, the provincial government-owned railroads of Alberta passed in to the control of the Canadian Pacific and Alberta National railroads, and the Alberta legislature lost one of its greatest bones of contention.

Will Not Issue Invitation

But British Government Is Still Considering Naval Conditions

London, Eng.—Replying to a question, Sir Austen Chamberlain, British foreign secretary, told the House of Commons that the government had no intention of issuing invitation to a new conference on naval disarmament.

Sir Austen re-affirmed a previous announcement that all questions, concerning British relations with the U.S. and the naval conditions of the two countries are under consideration by the British Government.

"Our examination of this is being diligently prosecuted," he said. "As soon as it is concluded the first step will be to communicate with the Dominions."

The foreign secretary said the recent statement on disarmament in Washington made by Sir Eric Howard, the British Ambassador, was not made on the instructions of the British Government.

Require More Radium

Small Supply Hinders Cancer Treatment

Toronto.—Effective treatment of cancer in Toronto, other than by surgery, is materially retarded by the small supply of radium available, declared Dr. Herbert A. Bruce, professor of clinical surgery, University of Toronto, in the course of a paper delivered before members of the Academy of Medicine.

Toronto's whole supply of radium, the speaker said, consisted of the small amount of one-half gram, valued at \$25,000 worth. The least amount necessary to successfully carry on a battle against the disease would be two grams, he added.

He suggested collecting a \$500,000 fund which could be used for the purchase of nine grams, an amount sufficient to enable local surgeons to effect many more cures in cancer than is now possible.

Suggests C.P.R. Branch

Line Into The Pas

Move Launched By Head Of Ross Navigation Company

The Pas, Man.—A move to have the Canadian Pacific Railway build a line into The Pas, was launched here, when Harvey Weber, president of the Ross Navigation Co., president of Transports, Limited, urged the Rotary Club to take the initiative.

Mr. Weber advocated asking the C.P.R. to build down the Carleton Place Valley to The Pas, and secure joint running rights over the Hudson Bay Railway. He declared numerous prairie towns south and west of here served exclusively by the Canadian Pacific Railway and thereby got one through freight rate to Churchill instead of two rates.

Canada's New Destroyers

Details Are Completed For First War Vessels Ordered By Dominion

London, Eng.—Commodore C. W. Rose, director of naval services in Canada, will return to the Dominion on the steamship Montclair, sailing for St. John, N.B., having concluded the final details for the two new destroyers for Canada.

The destroyers, to be completed in two years, are of the latest destroyer type of 1,330 tons, speed 37 knots and armed with four 4.7-inch guns and two two-pounder guns. They are the first war vessels ever ordered by Canada.

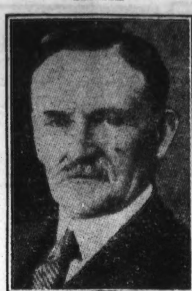

May Get Permit

Washington.—Bert Acosta, whose pilot's license was revoked by the commerce department last June, may be granted a new permit, but cannot use it until April 18. Acosta conferred here with assistant secretary of commerce MacCrahen, and was advised to appeal to the department for withdrawal of two \$500 fines for violation of air regulations and then take a new examination for a pilot's license.

Reindeer Shipped To Canada

Stockholm.—A consignment of 300 live Swedish reindeer, the largest number ever exported at one time, has been shipped to Canada through a Norwegian port.

CONSERVATIVE LEADER IN SENATE

Senator W. B. Willoughby, of Moose Jaw, on Feb. 8, was elected Conservative leader in the Senate at a caucus which was held in the capital.

May Create Another Province

Tenth Province In Northern Area May Be Solution

Edmonton.—That the Dominion Government could scarcely be expected to extend the boundary of any one of three prairie provinces—Manitoba, Saskatchewan or Alberta—without dealing with all three and also with the whole of that area now administered by the Dominion as the North West Territories, was the statement of Premier J. E. Brownlee in the Legislature here.

The Premier said that while he did not wish to directly quote any person, he had gathered while in Ottawa, that the disposition of the Dominion Government at present was rather to create another province from the territories than to divide them up between the other provinces.

The Premier said he was not inclined to take the reports of Saskatchewan's efforts in this direction seriously.

Quota System For Canada

Advocates Restriction Of Immigration To The Dominions

Ottawa.—A quota system for immigrants entering Canada is advocated by Hon. J. W. Edwards (Conservative, Frontenac-Addington).

Dr. Edwards, in a resolution placed on the order paper of the House of Commons, seeks approval of his opinion that "immigration to the Dominion of Canada should be restricted by the adoption of a quota system which, however, shall not be applied to the British Isles and the United States of America, and from which certain specified countries may be practically exempt."

Irish Minister To Germany

Dublin, Irish Free State.—The first minister of the Irish Free State to Germany will be Prof. D. Blayney. He is a member of the faculty of the National University of Ireland. It is the intention of the government to appoint a minister to Paris soon.

Starts New Exploration Flight

Byrd Expedition Reports Important Discoveries At South Pole

New York.—The New York Times, The St. Louis Post-Dispatch and their associated newspapers have received a delayed dispatch from their correspondent with the Byrd Antarctic expedition telling of a new exploration flight begun by Commander Byrd over King Edward VII. Land to the south of the mountains he discovered recently.

The flight was being made with two planes, a Fokker in which were Commander Byrd, Bert Balchen, pilot, and Lloyd Berkner, radio operator, and in the other Captain Parry, Harold June, pilot and navy radio operator.

The correspondent's brief dispatch was sent by dog team from Little America, the Byrd headquarters ashore, to the barque City of New York at the ice barrier, for transmission by wireless.

At the time it was sent the correspondent reported wireless messages coming from the planes showed that the flight was still in progress and already had been productive of important discoveries, which would be made known when the planes returned to their base.

Will Discuss Resolution

House To Debate Matter Of Binning and Loading Of Wheat

Ottawa.—The unloading and binning in public elevators of certain grades of wheat is the subject of a resolution placed on the order paper of the House of Commons, by T. L. Donnelly, Liberal, Willow Bunch.

Mr. Donnelly proposes that "the grades of wheat known as Nos. 1, 2 and Northern, and 4, 5 and 6 wheat binned to terminal points should be unloaded and binned only in public terminal elevators, under such regulations as will prohibit mixing of the grades either in the elevator or when being loaded into boats or cars, or in transit for milling or export." The matter will come up for discussion in the House shortly.

Ramsay MacDonald

Is Feeling Fit

Denies Reports That He Is Suffering From Failing Health

London, Eng.—Right Hon. Ramsay MacDonald, Labor Leader, has denied a report that he was finding his political responsibilities too heavy. It had been suggested that the Labor chief was in failing health.

He declared that as a matter of fact he was perfectly fit and was putting on weight.

Will Meet In London

London, Eng.—The Marchioness of Aberdeen and Temair, who is president of the International Council of Women, is calling a conference of rural women to meet for a fortnight in London, from April 30 to May 11, 1929. An appeal is being made especially to Canada to send some representative rural women—this because Canada is the pioneer in organizing rural women.

PAYS TRIBUTE TO LEAGUE OF NATIONS' WORK

Ottawa.—"There is no royal road to peace, but there are many paths which lead in the direction of peace and the Briand-Kellogg treaty is one of these paths," Premier King said during the House of Commons debate on the Kellogg-Briand pact.

Premier King paused at this moment to pay tribute to the work of the League of Nations towards peace. Touching upon disarmament, Premier King said it was true that progress toward disarmament has not been as great as one would like, but considerable progress had been made. The pact created a solemn covenant binding nations not to go to war as a means of settling differences.

The Senate of Canada has already ratified the pact.

Mr. King sketched briefly the history of the treaty, which he said, had now been accepted by 62 nations. Its disarmament is to be based on a feeling of revolt against war on the part of all nations which have had to do with war in the recent past.

The treaty did not pretend to establish machinery for the prevention of war, but it called forth from the nations of the world "a solemn renunciation of war as an instrument of national policy."

The League of Nations did not include within its membership all the nations of the world, said the prime minister, in pointing out some of the advantages of the treaty. The United States was not a member of the League of Nations, but it had signed the treaty for the renunciation of war. One or two other countries were in the same position.

Support of the treaty, coupled with a note of warning that there must be disarmament, peace is to be more than a dream, was the burden of the speech with which Hon. R. B. Bennett, Conservative leader, followed Mr. King.

Rationing Bread In Russia

People Are Using It To Feed Hungry

Moscow.—Bread books issued by the government will govern purchase of bread after March 15, the Moscow Soviet or governing committee has decided.

The committee, which acts when the Soviet is not in session, was ordered in a resolution to work out details governing the distribution of bread under the new order.

The resolution, after stating that the red capital was amply supplied with baked bread, went on to say that the main difficulty lay in speculation and in feeding cattle with bread which was cheaper than fodder.

Supplies For H.B. Terminals

House Told \$210,570.38 Was Spent In Halifax During 1927

Ottawa.—A sum amounting to \$210,570.38 was spent in Halifax by the department of railways and canals and the department of marine and fisheries in 1927 in connection with the activities in Hudson Bay. This was disclosed in a return tabled in the House of Commons in answer to a question by W. A. Black (Cons. Halifax). It was shown that the railway department spent \$20,359.96 with Halifax firms for supplies on account of the Hudson Bay terminals. The marine department bought \$40,721.99 worth of materials from A. S. MacMillan for the Hudson Straits Expedition, and \$139,511.43 worth from other firms in the way of supplies.

Will Visit Saskatoon

Saskatoon.—Viscount and Lady Willington will pay an official visit to Saskatoon, April 1, according to notification sent to Mayor Norman. Plans will be made to give the vice royal party a rousing reception.

Lady Lodge Dead

Saskatoon.—Lady Lodge, wife of Sir Oliver Lodge, the noted scientist and researcher in physical fields, died recently at their home near here. Sir Oliver was at her bedside.

Pirates!

No sailor, however, would be much alarmed if those pupils of Mary Isdale were at large upon the main. This bold band group featured the second program at the Sea Music Festival recently held at the Vancouver under the auspices of the Canadian Pacific Railway.

Scenes along the route. Sinclair Canyon,
left and the Locks of St. Mary, Man-
it Centre, as the Empress Hotel at Victoria will
appear. Vancouver, Chateau Lake Louise

Dean Sinclair Laird of Mac-
donald College, St. Anne de
Bellevue is better known as an
educationalist than a philanthropist,
but he is really both. Some years
ago he made a tour of the Cana-
dian west. His time was more or
less limited and in planning his
itinerary he was obliged to miss
several points he considered worth
while and to spend more time than
he thought necessary in places less
interesting. While he made up his
mind that this condition should
not obtain if he made the trip
again, he was greatly thrilled by
his journey. The beauty and the
wonder of the Canadian west
deeply impressed him and he re-

turned, as he says, with a more
sympathetic understanding of the
western people and problems and
more thoroughly convinced that
the education of a Canadian can
not begin until he has seen his own
country.

It was his idea that if a tour
could be organized at reasonable
cost, to cover all the important
cities and resorts west of Toronto,
and the participants were assured
of relief from all the worries of
travel arrangements, enough might
be interested to warrant the run-
ning of a special train.

Thus the first "Dean Laird
Special" came into existence and

this year, for the sixth time, and
in conjunction with the Canadian
Pacific Railway the Dean is again
organizing a de luxe all-expense
tour which for a stated sum,
affords the maximum of enjoy-
ment and variety of scene and
recreation that can be provided
in three summer weeks.

Dean Laird devotes a great deal
of time and energy to his tour and
each year goes over much of the
same ground, but he now knows
the high spots in western travel,
and by carrying on year after year
he feels that he is making his con-
tribution towards a greater and
more united Canada. Altogether,
Mr. Laird has piloted some fifteen

hundred people through the great
cities and scenes which lie between
Montreal and Victoria—Banff,
Lake Louise, Winnipeg, Edmon-
ton, Vancouver—or a diversified
route. He has found that, while
the travellers appreciate having
a special train as a home and base,
they appreciate the Great Lakes
and optional motor runs, so that
the steamships and the motor cars
are very generously used by him.

The Dean is doing a great work
and the only qualifications he
demands from applicants for mem-
bership in his tour are compati-
bility and the capacity for enjoy-
ment.

SPRUCE GROVE

\$2 for Three Years

The recent announcement
of the Family Herald and
Weekly Star to give a year
free with a two year subscrip-
tion appears to us a move in
the right direction. Not that
the Family Herald needs to
reduce its price; it is recog-
nized that at \$1 per year it is the
greatest value in Canada today.
The "year free" offer therefore,
means this—the subscription is
still one dollar for one year, but
for two dollars you receive a sub-
scription for three years instead
of two years.

Hundreds will literally leap at
this big offer and well they may.
When one considers that for a
two dollar bill you can have a
paper of the calibre of the Family
Herald and Weekly Star coming
to your home for three full years—
it goes without saying that it is
a somewhat tempting offer.

WHY SUFFER WITH HEADACHES ?

Why not have your eyes at-
tended to now, before it
is too late?

My prices are fully 25 p.c.
cheaper than elsewhere, as
I buy vast quantities direct
from the factories.

SONABLE PRICES.

The Battle of January:

January was a momentous month for wheat producers
the world over. Canadian farmers had delivered nearly
four hundred million bushels of wheat. Argentina and
Australia were commencing the delivery of unusually
large crops. There was an immense visible supply of
wheat. The market commenced to sag. The one opti-
mistic feature in a rather gloomy picture was the Cana-
dian Wheat Pool. Just what the Pool stood for is
told in candid language by George Broomhall, the
British grain authority, in "Milling":

"Prices were put down on the plea that Argentina
must sell more of her new crop, and, in fact, shippers
did put out lower offers, and some Canadian sellers fol-
lowed the downward lead.

"But it soon found that the Canadian Pool re-
fused to offer or sell at the lower prices, and, of course,
this gave Argentina shippers courage to work for a
reaction.

"The action of the Canadian Pool also gave buy-
ers confidence, and they not only found that they needed
wheat, but that they could pay better rates for it.

"As long as sellers are willing to 'out' prices, buy-
ers were quite prepared to stand back and let them do
still more 'cutting,' and quite possibly there might have
been a bad slump had not the Canadian Pool taken a
strong stand.

"The Canadian Pool Managers

certainly deserve credit for courageous handling of a
difficult situation, and their action proves that farmer
members of the Pool would not agree to low prices at
this period of the season.

"The lesson of the price movements of wheat in the
past week is that emphasis must be given to the
power of strong holders to maintain prices.

"Past experience showed that a crowd of weak
holders was almost at the mercy of buyers in times of
plenty.

"I think all must now recognize the commanding
position of the Canadian Pool, and the readiness of Ar-
gentine shippers to follow a strong upward lead."

Toronto, Ont.

CHAPTER XIV.—Continued.

Donald stirred as Andy applied the vander, and his one good eye opened slowly. "Did I win?" he questioned weakly.

"You bet your blinkin' life you did. When Donald's face rested on Connie's face twisted into a very smile. He reached for her hand and held it in a firm pressure. "Good little sport," he whispered through split lips.

Connie felt as though her heart would burst. Scorching tears ran down her face, and it was with the utmost difficulty that she controlled the suffocating sobs that filled her throat.

The sound of the big mill whistle smote their ears in a wild melody of short, sharp blasts, quite unlike the decorous tone that summoned and dismissed the men.

"What's that?" asked Donald, attempting to sit up.

"The engineer is celebrating, Donnie. The men 'ave returned to work. The strike is broken."

"Ah!" sighed Donald happily as he fell back on the pillows.

"The distant hum of a gas car gradually increased to a series of staccato explosions, then died out suddenly. They heard the light rumble of wheels as it drew to a stop at the station house. There was the sound of quick foot-steps on the board sidewalk and the door opened to admit Dr. Paul. He crossed the room and took Donald's hand, "Is it true," he asked incredulously, "that you whipped Ole Hand?"

"Strike me pink if I didn't," Andy vouchsafed.

"I have patted up Hand's victim's many times," the doctor stated, "but this is the first time that I have attended the victor, and I can assure you that it's a pleasure." He removed his coat and rolled up his sleeves. "I'll look you over," he added, then glanced significantly at Connie, who rose and left the room.

"A couple of cracked ribs, a fractured ulna, and a few hundred bruises," was the doctor's verdict a few minutes later.

The physician's deft hands soon bandaged the broken ribs and set the bone of the forearm.

"I'll go and patch up the fallen bully. I hope he's worse still," he chuckled as he left the room.

HELPED DURING MIDDLE AGE

Woman Praises Lydia E. Pinkham's Vegetable Compound

Sarnia, Ont.—"I am willing to answer letters from other women, to tell them the wonderful good Lydia E. Pinkham's Vegetable Compound did me. I cannot be thankful enough for the benefits I received during the Change of Life. I do housework and my troubles made me unfit to work. A friend advised me to try the Vegetable Compound. I felt great relief at once, began to regain my appetite, and my nerves got better. I will recommend your medicine to all with troubles like I had."—Mrs. JOHN BROWN, 182 N. Christina St., Sarnia, Ontario.

W. N. U. 1774

Andy stepped to the door and called in Connie.

"Don't look so frightened, Connie," smiled Donald. "I don't feel half as bad as I look."

"I'll have to go now," she said in a voice choked with emotion.

Andy accompanied her outside the door. "Ave a bite to eat, Connie?" he invited.

Connie shook her head. Now that the excitement was over, the strain of the emotion she had experienced showed in the dark shadows under her eyes and in the droop of her slight shoulders. "Andy," she began as she placed a small hand on his arm, "you—you won't say anything what—that I—"

A flood of rose dyed her tanned cheeks and her blue eyes fell in embarrassment. Andy patted her shoulder reassuringly.

"I'll never say a blinkin' word, Connie; an oyster's got nothin' on me."

Connie, visibly relieved, picked up her gun and started up the hills. Andy watched the pathetic little figure until she disappeared in the woods. For a moment he stood staring into nothingness, then, shaking his head sadly, he entered the cabin.

"She's a little brick, Andy," Donald glared weakly from his bed.

Andy glared at him. "Pickin' he repeated sarcastically. "Is that all? You big, bone-headed, blinkin' boob!" He slammed the door as he went out to give emphasis to the remark.

"What the devil does he mean?" puzzled Donald. He turned impatiently to his side, yawning equally as patiently, then fell into a sound sleep.

CHAPTER XV.

On the third day of Donald's convalescence he was able to leave his cabin. With his arm in a sling, his face patched with plaster, he made the rounds of the mill.

The men welcomed him with eager nods and smiles, many coming forward to shake his hand in silent respect. The big plant was now going at full blast. Belts flapped, logs thudded, planers moored loudly, and the great saw ripped shrilly through the big logs in a rising crescendo of sound.

Down at the siding an engine bumped noisily into a long string of flat-cars piled high with lumber. With arms akimbo, his wet under-shirt clinging to his powerful torso, the mop of blond hair hanging damp on his brow, Gillis stood surveying the heavily-laden cars with an air of complacency. The lumber handlers sat about in positions of weariness, mopping their hot faces.

Gillis smiled cheerfully as Donald approached.

"Good news for you, Donnie," he said.

"What is it, Jack?"

"Last night for the big steamer," replied Gillis, as he pointed at the moving train.

"We're on time, then," cried Donald gladly.

"One day ahead," corrected Gillis.

The engineer came to the cab window at the engine passed, and pentonized his congratulations by shaking hands with himself. The train gathered speed, and as the caboose rattled by, the conductor came to the rear platform.

"Good work, boys!" he shouted.

They stood watching the train until it struck the down grade and disappeared through the cut.

"Well, that's over," observed Gillis, as he sat down heavily and wiped the sweat from his face. He looked tired and worn, but the light of victory shone in his eyes.

"If it hadn't been for you, Jack," said Donald earnestly, "we would not have got that order away on time. You look all in; you'd better have a good sleep."

The big man's eyes brightened at Donald's praise.

"You don't look like you'd bin to a Sunday school picnic," replied Gillis with a chuckle.

As Donald walked up the hill the whistle blew for the noon-hour, and the men trooped past on their way to the dining-room. Blackie left the ranks and walked shamefacedly to Donald's side.

"I'm sorry for the part I took in the strike, boss, I—"

"It's all right, Blackie," interrupted Donald, "you more than made up for it. We'll forget all about that."

Blackie's face wore a relieved look as Donald gave his hand a friendly grip.

Meals in logging camps are eaten in silence and with a fixity of pur-

Children Like It—So Will You
At the first sign of a cold, run, sneeze, or cough, give your children this. It's the best thing you can give them. It's the only thing that will cure a cold, bronchitis, pneumonia, whooping cough, croup, and all other lung troubles. It's the only thing that will cure a cold, bronchitis, pneumonia, whooping cough, croup, and all other lung troubles. It's the only thing that will cure a cold, bronchitis, pneumonia, whooping cough, croup, and all other lung troubles.

75c. and 40c.

pose. It is a business to be finished with as hurriedly as possible. From the time the men are seated until the chairs are pushed back, the clatter of dishes and an occasional "pass the butter" are the only sounds.

As Donald moved to his place at the table the men arose and clapped their hands. Someone called for a cheer, but Donald laughingly held up his hand.

"Men, I can't find words to tell you how much I appreciate your good work. Your long hours of labor enabled the Company to get an important order away on time, thereby saving their prestige in a big Eastern market. You will receive double pay for every hour you worked during the week."

A low murmur of applause followed this welcome announcement.

After lunch, feeling the need of exercise, Donald made his way down the hill. The severe mauling and the days in bed had weakened him to such an extent that he was forced to take frequent rests. As he turned a curve in the trail, Hand and the man with whom Andy had fought crawled stealthily from the bush, looked furtively about them, then followed Donald down the hill. He reached the open glade by the fairy nest to find Connie seated by the rippling stream, her chin resting in cupped hands, and staring dreamily into the flashing water.

"Ah!" he cried gaily, "I have caught my little dryad at her orisons."

At the sound of his voice Connie sprang to her feet, her heart beating madly. Hearing a sound behind him, Donald turned to find the eyes of the Breed fixed on him in a malignant glare that chilled him to the marrow. For a short interval the dusky eyes of the Indian held his as though with a hypnotic power.

"When!" he ejaculated, as the Breed hobbled down the trail, "your guardian sure does give me an awful look. Why does he hate me, Connie?"

"Joe has peculiar ways," she parried.

"What were you dreaming about, Connie?" he asked interestedly.

A gay light danced momentarily in her shining eyes, and the red lips curved in a smile: "I was dreaming I was rich," she archily confessed.

"An old, old dream," smiled Donald as he stretched himself painfully on the moss.

Connie sat down near him.

As always, this spot gave Donald a restful feeling. The gentle zephyrs wafted from the woods about them were so monotonously delicious and the sparkling glacial stream that rippled through the glade sang its clear, sweet song. He closed his eyes wearily.

The proximity of the man she loved, lying there with his arm in a splint, his handsome face still bearing the marks of the blows he had suffered in her defence, thrilled Connie to the depths of her warm, impulsive heart. An almost overmastering desire to touch his hair possessed her.

"What would you do if you were rich, Connie?" he queried drowsily.

Connie nuzzled him in the delicious moss and clasped her hands behind her golden head. "I'd buy a big trunk—one of that kind with the bulgy top—and I'd fill it with silks, satins, brocades, velvets and all kinds of soft, soft things. Then I'd unpack it slowly one by one and hang them up all around the room and sit down and look at them. I'd buy a great, big stone house in London, and I'd walk down the wide marble stairs, trailing a long rustling silk gown, and I'd raise myorgette to my eyes and say, 'James, have my carriage at the door in half-an-hour. I'd have a country place in Scotland, with hundreds of dogs and horses,

thousands of birds, and acres of flowers."

"She paused for a moment."

"I'd take Dad and Peggy with me everywhere I'd go," she went on softly, "and I'd buy Dad millions of books, and for Peggy I'd buy a solid gold-mounted bride, and lots of warm blankets for winter instead of those old scarves. I'd buy lots of good things to eat, and lots of good clothes for all the poor kiddies in the world."

"She looked up at the hills. "And six months out of every year," she continued, "I'd live right here in these mountains and come every day and sit beside—beside this stream."

"She raised herself slowly and looked down at Donald as he lay with closed eyes. Leaning forward until her golden curls almost touched his dark hair, her eyes rested on a purple bruise on his brow. "And," she finished fiercely, "I'd kill every man like Ole Hand."

Donald laughed sleepily.

"Connie, you are a dear little girl," he said tenderly.

The endearing tone held a paternal ring, and Connie bit her lip in vexation.

"I'd like to have your father go with me to Vancouver some day. Will you go?"

(To Be Continued.)

Guard Against FLU — Sore Throat The First Warning.

Few families will escape. This epidemic constitutes a real danger. Health authorities everywhere warn the public of the danger of the common cold. Flu usually starts with Sore Throat. The germs are killed by some antiseptic treatment a serious malady may develop.

A simple treatment is to gargle the throat three times daily with Nerviline. The antiseptic properties of Nerviline quickly destroy the germs in the throat. Of course if the chest is sore Nerviline should be rubbed over the affected area—lots of rubbing—it can't burn a blister, but will bring out the congestion and break up the cold.

To prevent "Flu" or colds from gaining headway Nerviline will prove most effective. It is hardly necessary to point out that the bowels should be stimulated, and the system purged of all waste materials. For this purpose Dr. Hamilton's Pills are recommended. They act without griping or discomfort of any kind. This combination treatment of Nerviline and Dr. Hamilton's Pills will prove a very satisfactory prevention for Grippe, Flu, etc.

WINDOLITE The Improved Glass Substitute

MADE IN ENGLAND

COMES WITH A MESSAGE OF HEALTH

THE sun is the all-powerful life producer. Nature's universal disinfectant and germ destroyer, as well as stimulant and tonic. WINDOLITE is the sun's most important ally.

Medical research has definitely proved that from the point of view of Health and Hygiene, the most effective among the sun's rays, are the Ultra-Violet rays, which possess the greatest power for the prevention and cure of disease and debility.

Science has further established that ordinary window glass does not allow the passage of Ultra-Violet rays, so that by using glass we are artificially excluding these vital health-giving rays. Therefore, the invention of WINDOLITE has completely satisfied the long-felt want. Exhaustive experiments have conclusively proved that it is a most effective substitute for glass, that it freely admits the Ultra-Violet rays, and that its use has a most beneficial effect on the growth and development of plants and chickens and on the well-being of cattle, enabled for the first time to have healthy light instead of darkness in their sheds.

Indeed, the discovery of WINDOLITE has during the last six years completely revolutionized gardening, given a new stimulus to poultry breeding, increased the egg-laying capacity and fertility of chickens, has greatly improved the health of cattle and is now being used in domestic and household requirements.

WINDOLITE stands for 100 per cent. sunlight. It makes light but strong windows for cattle sheds, dairy stables, poultry houses, brooders and all out buildings. It is economical, unbreakable, flexible and is easy to cut and fit. It is now being successfully used for sunrooms, verandahs, schools, factories, hospitals, sanitariums, hot beds, plant coverings and greenhouses. It keeps out cold—will not crack or chip—cuts with an ordinary pair of scissors and is easy to fit. WINDOLITE is supplied in rolls any length but in one width of 36 inches only. A square yard of WINDOLITE weighs about 14 ozs. while a square yard of glass of ordinary thickness, weighs about 135 to 150 ozs. The improved WINDOLITE requires no varnish. WINDOLITE is made in England.

Price \$1.50 Per Square Yard, F.o.b., Toronto.

IT PAYS TO PAY CASH.

Mr Roy Alton left this week on a business trip to Melville, Sask.

Mr and Mrs A Meredith were in attendance at the Livestock Association's banquet on Friday evening, at the Macdonald hotel.

At the local Court, Tuesday, there were no Police cases, the Giese case being set over till the roads open up. Magistrate Williams was engaged with small debt cases.

A dance is billed for Carvel hall next Saturday evening, March 2d.

Auctioneer Zucht will hold a sale Fri. March 8th, of the stock and implements on the Pete Sladkoff farm, at Glory Hills. The sale is on the order of the S.S.B.

The farmer's best friend is The Family Herald and Weekly Star, Montreal. It costs only a dollar a year.

Card of Thanks.

I wish to thank all those kind friends who supported me at the Municipal election on Saturday last.

CHRISTIE FITZLER.

Golden Spike

Died, at Golden Spike, on Saturday, Feb. 23rd, Elsie Trautman, aged 7 years; daughter of Mr and Mrs P W Trautman. The funeral took place on Monday.

Died, at Golden Spike, on Friday, February 22d, Jac Schwitzer, in his 22nd year, son of Mr and Mrs Jacob Schwitzer. Funeral took place Sunday afternoon.

CARD OF THANKS—I wish to convey my hearty thanks to my friends for their good work done on election day, in re-electing me as Councillor.

Yours, DAN GIESE.

Test Your Seed Wheat.

Testing of seed wheat is strongly recommended. Seeding a couple hundred grains of sample of seed to be used, in a flower pot or box, and keeping the soil moist, a good idea is obtained of what the seed will do when placed in the ground in the spring. Clean, pure seed that will germinate evenly will increase the bulk and quality of the crop.

ON THE SIDE.

Following the incident in the local Court last week, while taking the oath as a witness, of going thru the motions of kissing the Book and merely touching the thumb with the lips, a somewhat similar case occurred the next day in Magistrate McLeod's court, in Edmonton, where a young girl admitted she had purposely omitted kissing the Book, while apparently going thru the motion. This reminds us of the story which came up from Calgary a short time ago. A Chinaman had been assaulted, and went to his lawyer to see about getting redress. The lawyer was in a hurry, as he was leaving town, but told the Chink what to do. On his return, the legal light sent for the Chink and inquired what he had done. The Celestial replied: "Me go to judge, him write lot on paper and then me smellum Bible."

Appeal from Weed Inspector

If the proposed amendment to the Noxious Weeds Act be passed, an order from an inspector respecting a weed-infested farm may not be final. A clause providing for some form of appeal from the order of an inspector respecting weeds on a farm, will be incorporated in the weeds act when it comes before the Assembly.

The Minister of Agriculture says that, for really efficient handling of the weed menace, there should be first-class agricultural agents throughout the province whose function was not that of enforcement agent, but rather to assist and teach farmers methods of farming which would eradicate weeds.

Pool Elevator Program.

A tentative list of points at which the Alberta Wheat Pool will build or buy elevators during the coming season has been issued from the Pool office. The total number of points is 56, but the list is by no means a final one.

The Alberta Pool has now 318 elevators located at country points, and the additions will bring the number up to 374.

The number of elevators to be built and the number purchased will depend on the prices asked by elevator companies for elevators they are willing to sell, and also on the price of lumber.

Whenever the Pool decides to go into a new point it is usual for the organization to make an offer to purchase if there is an elevator there which will meet the requirements. In this way the Pool has acquired a considerable number of houses and avoided wasteful duplication.

Notice to Creditors and Claimants.

IN THE ESTATE OF GEORGE STEVENS, late of Stony Plain, Alberta, Farmer, Deceased.

NOTICE is hereby given that all persons having claims upon the estate of the above-named George Stevens, who died on the 23rd day of January, A.D. 1929, are required to file with the Solicitor for the Executors by the 31st day of March, 1929, a full statement duly verified of their claims and of any securities held by them, and that after that date the Executors will distribute the assets of the deceased among the parties entitled thereto, having regard only to the claims of which notice has been so filed or which have been brought to her knowledge.

DATED this 12th day of February, A.D. 1929.
GEORGE J. BRYAN,
Solicitor for the Executors.

Spruce Grove M.D. Elections

Following are the results of the municipal elections held on Saturday last—

Div. 2—Dan Giese re-elected as councillor with 64 votes; Louie Goebel 53; Gust Schuster 52.

Div. 4—R J Johnston 88; Rudder 43.

Div. 6—Reeve E C McLaughlin was re-elected, receiving 129 votes, against Mr D Brox's 49 votes.

CARD OF THANKS—I wish to publicly thank the Electors of Div. 6 for their loyal support at the recent election for Councillor. It shall be my purpose to merit their confidence by serving the municipality to the best of my ability.
E. C. McLAUGHLIN.

Had Some Practice.

Shop Assistant—A collar for your husband? What size?
Mrs Jiggs—I've forgotten the size, but I can just reach around his neck with both my hands.

Here and There

245
In 1921 the Canadian Pacific paid out \$2,000,000 from freight revenue in loss and damage claims. In 1927 it paid \$700,000, a decrease of \$1,300,000, although in the same period the gross freight revenue had increased by \$15,000,000. Better freight handling did it.

The stonework and masonry of the part of the Royal York Hotel have been completed, and there appears every likelihood that the great building will be open to the travelling public by June 1. This hotel is the largest and tallest in the British Empire.

Some idea of the world-wide area over which the Canadian Pacific operates may be gathered from the fact that in making out its monthly balance it is necessary to turn fifty-nine different foreign currencies into dollars in order to get an accurate result in Canadian money.

Wireless is now being used to aid in the protection of forests against fire. The Canadian Provincial government planes are equipped with the latest apparatus with a radius of 400 miles, so that the headquarters may be readily communicated with and immediate steps taken upon the discovery of an outbreak.

"The principle of rapid freezing has such qualifications that there seems to be little room for doubt that it is going to revolutionize the fishing industry," stated W. A. Found, deputy minister of fisheries. "We intend to make the experimental station at Halifax of the utmost value to the whole industry."

W. J. C. Madden of Calgary, is making arrangements with the Canadian Pacific Express Company for the transportation of whitefish caught in Great Slave Lake from Edmonton to Chicago. It is intended that the distance from the fishing ground to rail head will be covered in winter by five-ton trucks operating upon the thick ice of the Slave and Athabasca Rivers, traversing country that would otherwise be difficult to cross.

A new and strange form of wildlife is being imported into Alberta by the Calgary Fish and Game Association, which has arranged to secure 2,000 Mongolian and Chinese ring-necked pheasants. The birds are to be liberated this summer throughout the southern part of the province, where 1800 were placed last season as part of the Game Association's plan for re-stocking Alberta's game bird supply. With all these Oriental birds loose the ancient Yellow Peril seems more imminent.

Clipping as much as an hour and a half off her schedule eastbound, and half an hour westbound, the Trans Canada Limited, Great River of the Canadian Pacific Railway running between Montreal, Toronto, and Vancouver, will be further remarkable this summer by reason of a "solarium" car, containing baths and a special sun-room, that will be included in her luxurious equipment. The Mountaineer, another speedy summer train, running between Vancouver and Chicago will also have "solarium" cars. The Trans Canada makes its first run on May 12. The Mountaineer on June 10. The former train makes 143 trips during the summer season covering a distance equal to about fifteen and a half times around the world.
